Catalogue Digital Editions

Gathering evidence to understand practice

Why? Since 2012 the Catalogue of Digital Editions has been gathering digital editions and texts in an attempt to survey and identify best practice in the field of digital scholarly editing. Analogous initiatives exist but don't provide the granular analysis of features necessary to better understand the rationale and methodology behind the creation of a digital edition. This Catalogue provides an accessible record of standards and building technologies used, and thus an insight into past and present projects.

How? Development on this web application began in 2016 and aims at delivering the Catalogue data in an interactive and user-friendly manner, allowing users to browse, search, filter and order projects around their research interests.

What? The Catalogue continuously adds digital editions and always seeks external contributions. For instructions on how to submit a digital edition to the Catalogue, please visit the [Documentation](#) page of this site.

Projects added will be exposed to 317 German libraries thanks to the Catalogue's integration into the German Library Network (DBIS).

a digital scholarly edition ...

- is anchored in a historical analysis of the materials
- presents hypotheses about creation and change
- supplies a record and classification of difference over time, in many dimensions and in appropriate detail
- may present an edited text, among all the texts it offers
- allows space and tools for readers to develop their own hypotheses and ways of reading
- must offer all this in a manner which enriches reading

Description Reviews Author Series Subjects

About the Book

This book provides an up-to-date, coherent and comprehensive treatment of digital scholarly editing, organized according to the typical timeline and workflow of the preparation of an edition: from the choice of the object to edit, the editorial work, post-production and publication, the use of the published edition, to long-term issues and the ultimate significance of the published work. The author also examines from a theoretical and methodological point of view the issues and problems that emerge during these stages with the application of computational techniques and methods. Building on previous publications on the topic, the book discusses the most significant developments in digital textual scholarship, claiming

In breve

Il libro è una mappa concettuale e metodologica delle nuove prassi ecdotiche sviluppatesi in ambiente digitale e non un manuale d'uso. Il volume presenta una cartografia ragionata del panorama editoriale digitale sviluppatosi in Italia e all'estero a partire dagli anni Quaranta e offre al lettore gli strumenti essenziali per valutare, capire e interpretare l'edizione scientifica digitale, i suoi vantaggi, i limiti e le sfide per il futuro.

IN BREVE

Il volume propone un'introduzione rigorosa e multidisciplinare a un campo di studi in continua espansione ed evoluzione, con una prospettiva che valorizza la tradizione di studi italiana, pur collocandola nel vivace scenario internazionale. I saggi che lo compongono forniscono una mappa della "galassia" delle Digital Humanities, articolandosi in due [...]

119

KRISTA STINNE GREVE RASMUSSEN

A digitized edition is not a digital edition.

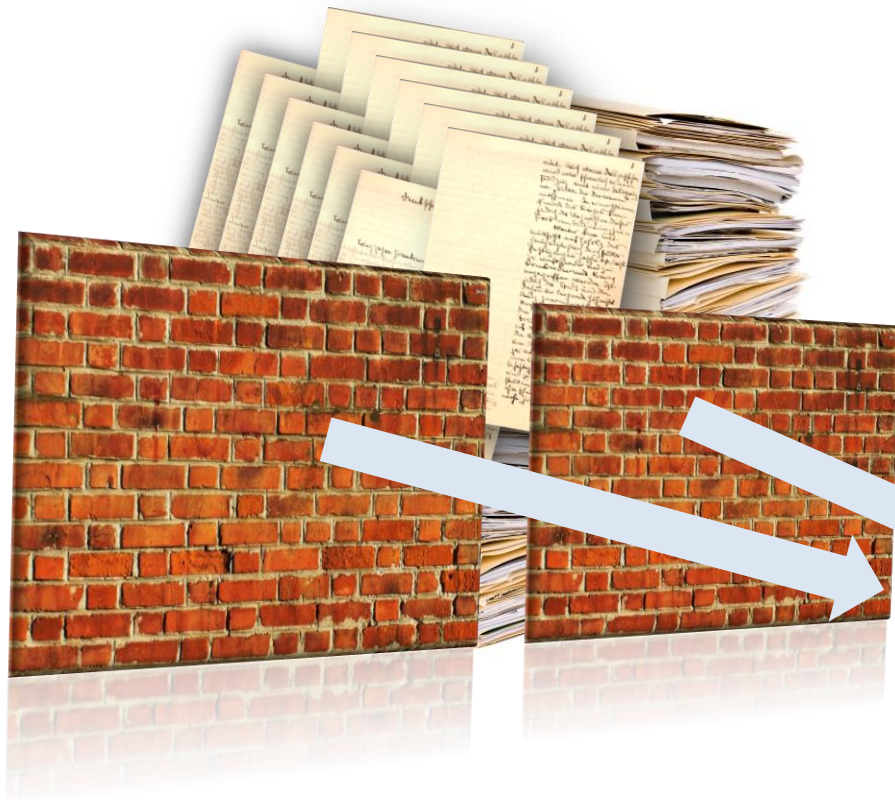

A digital edition cannot be given in print without a significant loss of content and functionality.

A digital edition is guided by a digital paradigm in its theory, method, and practice.

Patrick Sahle, "What is a Scholarly Digital Edition (SDE)?" in *Digital Scholarly Editing. Theory, Practice and Future Perspectives* (Open Book Publishers, 2016), ed. Matthew Driscoll and Elena Pierazzo, 19-39.

the digital paradigm

access, space, modality, function, fluidity, markup,
process, collaboration, openness, interaction,
participation, transmedialisation

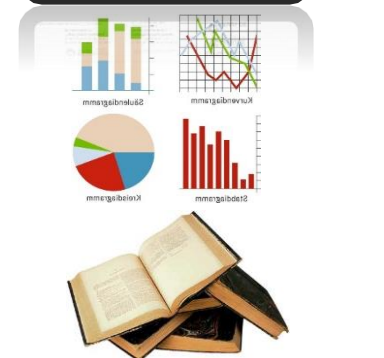

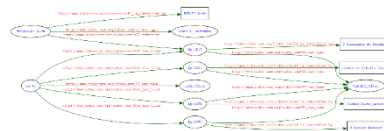

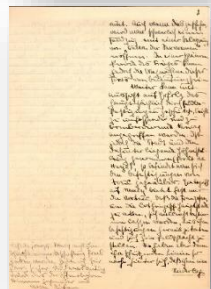

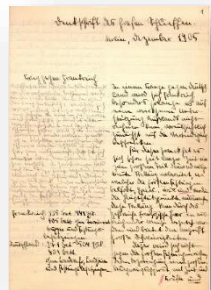

separation of content and form

documents

representation

presentation

separation of content and form

content: *re-presentation*

- data & metadata: images, texts, mark-up, annotations
- data models

form: *presentation*

- publication/visualisation: website, print, etc.
- realisation of perspectives

Information, documents and texts are maintained and represented without determining a publication format.

The project Magica Levantina (ML) aims at the edition of mainly unpublished Greek magical texts from towns in the Levant in the late Roman Imperial and early Byzantine periods. Most of the texts are curses inscribed on sheets of lead but also some protective charms inscribed on sheets of gold and silver. For further details, see [About](#).

Cherubs of the Cherubs, help (me) and cast down the horses of the Green party, Cherubs of Cherubs. I call up the most high and undefiled God, the one and only God, the (god) of Michael and Arphael (= Raphael); and I call upon the Cherubs of the Cherubs; I call upon |4 the enthroned (? angels?) of God, the one and unseen God. Arphael (= Raphael), Michael, Cherubs, bind for me the horses of the Green party (whose names are) inscribed on this tablet. Cherubs, may Demagagos not live. Adonaiei, let Palatinos not live. - - -, let Numphikos not sleep. God of gods, let Orpheus collapse. |8 - - - let Lampadouchos be lame. Spirits of the underworld, let Phamosos collapse. I adjure also the enthroned (angels) of God, let Inachos not live. I adjure the fiery angels: let Superbus not live, let - - - not run. Michael, your Cherubs, let Alumnos be lame. Enthroned (angels), |12 let Siglatos collapse. Michael, Arphael (= Raphael) let Polymedes not wear (the wreath). I call upon the enthroned (angels) - - - power of God - - - your enthroned angels, let Litho[] not live - - - Cherubs, let Philobacchos not sleep. I call upon - - - | 16 let Trunphatos. God of gods, let Authairetos not live. - - -, let Konsulos not live. Adonaei, let Brabeutes move sideways. - - - Kallichetes. Highest God of gods, let [] suffer from dracontiasis (?). - - -]risos. God, let Porphyrios move sideways. - - - |20 - - - the Green faction - - -

[Edit](#)

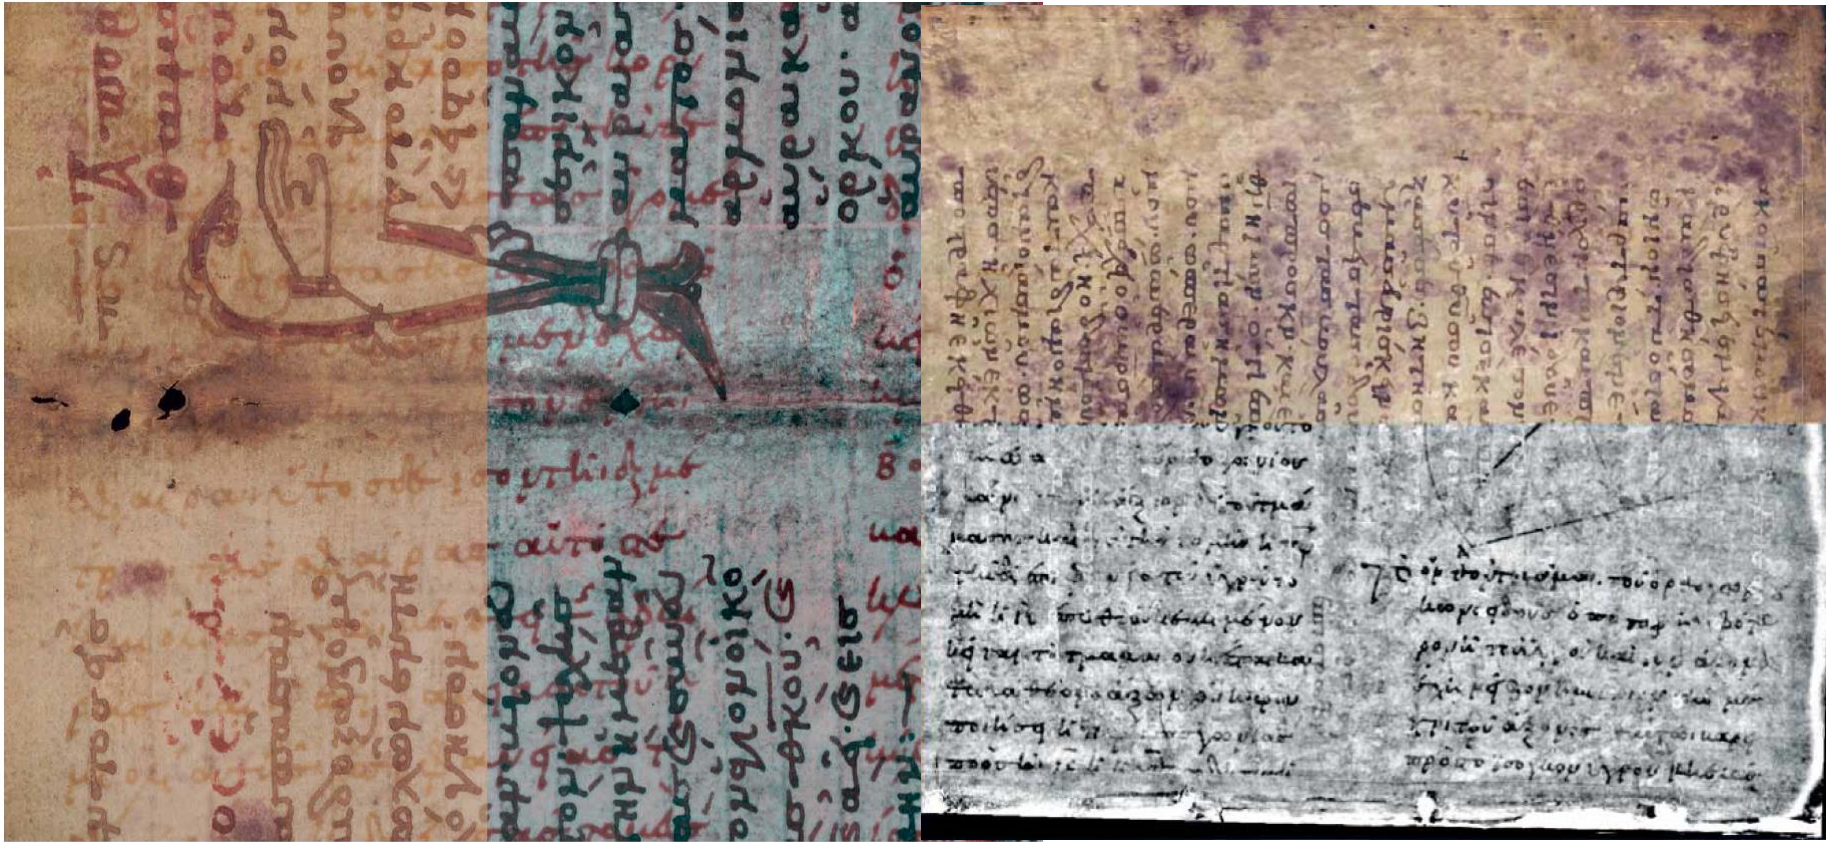

Fig. 1: Visual appearance (on left) compared to pseudocolor rendering (on right) of a section of an Archimedes Palimpsest leaf (f. 94r–91v of the *Euchologion* overtext) including gutter. The visibility of the undertext relative to the parchment is enhanced because of the rendering in a contrasting color.

How do you read a two-thousand-year-old manuscript that has been erased, cut up, written on and painted over? With a powerful particle accelerator, of course! Ancient books curator William Noel tells the fascinating story behind the Archimedes palimpsest, a Byzantine prayer book containing previously-unknown original writings from ancient Greek mathematician Archimedes and others.

This talk was presented to a local audience at TEDxSummit, an independent event. TED's editors chose to feature it for

|Incipit summa magistri guillelmi¹ autissiodorensis de officiis ecclesiasticis²

(PROLOGVS)

1. "Ierusalem que sursum³ est^{4 a}", mater nostra dicitur propter tria. Sumus enim filii eius per doctrinam apostolorum et aliorum sanctorum, qui sunt ciues illius ciuitatis. Sumus etiam filii eius per intercessionem. Ipsa enim intercedit pro nobis, quod haberi potest⁵ per illud tercii regum i, ubi dicitur⁶, quod bersabee, que interpretatur puteus sacietatis^b, impetrauit regnum filio suo salomoni^c. Sumus enim⁷ filii eius conformatione. Ei enim, dum uluimus, conformari debemus, quod habetur per illud exodi xxu in fine⁸, ubi dicit dominus moysi: "omnia fac secundum exemplar, quod tibi monstratum est in monte^{9 d}".

2. Maxime autem conformari debemus celesti ierusalem in laudando deum. Vnde apocalipsis iiii habetur, quod "animalia oculos undique habentia requiem non habebant¹⁰, dicentia: sanctus, sanctus, sanctus^e" et cetera.

3. Conformare igitur nos debemus ei laudando deum ad exemplum ipsius. Quia uero non potest ecclesia militans imitari ecclesiam triumphantem plenarie propter hoc, quod dicitur genesis iiii¹¹: "in sudore uultus tui^{12 f}" et cetera¹³, et sapientie ix: "corpus quod corrumpitur, aggrauat animam^g". Et ideo neccesse habet homo aliquando intendere eis, que sunt neccessaria corpori.

4. Propter quod non potest incessanter laudare deum¹⁴, facit quod potest, horis statutis laudando deum octies in die naturali^A, secundum quod hesdras instituit: "quater in die et quater in¹⁵ nocte^h". Dauid etiam¹⁶ dicit: "septies in die laudem dixi tibiⁱ". Et iterum: "media nocte surgebam ad confitendum nomini tuo, domine^j". Et hunc ordinem sequitur ecclesia^{k l}.

5. Quidam ita diuidunt: media nocte canitur officium nocturnale¹⁷, matutine laudes, et sex alie de die. Missa oblatio est et non numeratur inter

Rationale divinatorum officiorum

Übersetzung und Verzeichnisse von Herbert Douteil,
mit einer Einführung herausgegeben und bearbeitet
von Rudolf Suntrup

Teilband I

phrasiert ihn in den inhaltlich vergleichbaren Textabschnitten durchgängig⁶⁰.

Als Hauptquellen sind die Liturgieerklärungen des ausgehenden 12. und des 13. Jahrhunderts besonders hervorzuheben:

Johannes Beleth (1135–1182), dessen *Summa de ecclesiasticis officiis* er vielfach benutzt, ohne ihn namentlich zu erwähnen⁶¹,

Sicard von Cremona (1150–1215), *Mitrale seu de ecclesiasticis officiis summa*⁶², das Werk ist in seiner Gesamtkonzeption für Durandus vorbildhaft,

Innozenz III. (Lothar von Segni, um 1160–1216), *De sacro altaris mysterio*⁶³,

Praepositinus von Cremona (ca. 1135–1210), *Tractatus de officiis*⁶⁴,

dessen Schüler Wilhelm von Auxerre († 1231), *Summa de officiis ecclesiasticis*⁶⁵.

Unter den lateinischen Kirchenvätern zieht er häufig Augustinus, Hieronymus und Gregor den Großen als Gewährsleute heran; für etymologisierende Namens- und Begriffserklärungen war ihm – wie mittelalterlichen Autoren durchgängig – Isidor von Sevilla der maßgebliche Gewährsmann. Damit sind – neben der Bibel – nur die wichtigsten Quellen genannt⁶⁶. Zitate aus der Heiligen Schrift durchziehen den Gesamttext und übernehmen oft die Funktion der Legitimierung einer bestimmten Auslegung.

Hinzu kommen die juristischen Quellen, deren Zitierung sich quer durch den ganzen Text zieht. Aus dem Kirchenrecht sind es die Sammlungen des *Decretum Gratiani*, des *Liber Extra* Gregors IX. und des

⁶⁰ Entsprechend beschreibt und deutet Durandus das Ritual für den „Priester oder Bischof“, für den „Pontifex oder Priester“, oder er gibt liturgische Handlungsanweisungen für die Messfeier in Anwesenheit des Papstes.

⁶¹ Iohannis Beleth *Summa de ecclesiasticis officiis*, hg. von Herbert DOUTEIL (CCCM 41/41A), Turnhout 1976; deutsche Übersetzung: Johannes Beleth: *Summe der kirchlichen Offizien*. Einleitung, Übersetzung und Anmerkungen von Lorenz WEINRICH (Corpus Christianorum in Translation 11), Turnhout 2012.

⁶² PL 213, 13–434; kritische Ausgabe: Sicardi Cremonensis episcopi *Mitralis de officiis*, hg. von Gábor SARBÁK und Lorenz WEINRICH (CCCM 228), Turnhout 2008; deutsche Übersetzung: Sicard von Cremona, *Mitralis*. Der Gottesdienst der Kirche. Einleitung, Übersetzung und Anmerkungen von Lorenz WEINRICH (Corpus Christianorum in Translation 9), Turnhout 2011.

⁶³ PL 217, 775–916; die Schrift hat Lothar von Segni, der spätere Papst, in seiner Zeit als Kardinaldiakon um 1195 verfasst; die Teile 2–3 und 5–6 sind kritisch ediert von David F. WRIGHT (PhD Diss. Notre Dame, Indiana, 1977). Nach Wright lautet der Name der Messerklärung in den Handschriften *De missarum mysteriis*.

⁶⁴ Hg. von James A. CORBETT (Medieval Studies 21), Notre Dame, Indiana, 1969.

⁶⁵ Der Text ist nicht ediert; in CCCM 140/A/B zitiert nach Hs. Douai, Bibl. municipale, 65 (vom Anfang des 14. Jh.).

⁶⁶ Vgl. dazu in unserer Ausgabe das Verzeichnis der zitierten Autoren und Werke, das (basierend auf den Angaben der kritischen Edition) mehr als 100 Autoren aufführt. Mit Abstand am häufigsten sind inhaltliche oder wörtliche Übernahmen aus Innozenz III. nachgewiesen.

[Home](#) | [Confessio/Epistola](#) | [Manuscripts/Prints](#) | [Special Features](#) | [About](#)

'My name is Patrick...

I am a sinner, a simple country person, and the least of all believers. I am looked down upon by many.

My father was Calpornius. He was a deacon; his father was Potitus, a priest, who lived at Bannavem Taburniae.

His home was near there, and that is where I was taken prisoner.

I was about sixteen at the time.

History as a Visual Concept

Author: **Peter of Poitiers**, lat. Petrus Pictaviensis

- * ca. 1125 – 1205, theologian
- * pupil of Peter Lombard
- * successor of Peter Comestor,
 - cathedral school of Notre Dame, Paris,
 - chair for theology (1169), chancellor (1193)

Works, e.g.:

- * Sententiarum libri quinque;
- * Historia scholastica, last part on Acts of the Apostles
- * **Compendium historiae in genealogia Christi**
 - written around 1180
 - over 300 known witnesses (scrolls and codices)
 - diagrammatic synoptic view of biblical history

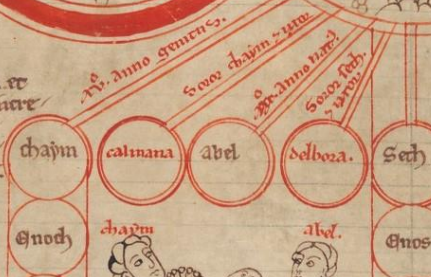

Considerant hystorie sacre plurimam nec sit et difficultatem scolaryum q̄ circa studiu
facere lectionis. ⁊ maxime illius que in hystorie fundameto ueritatis. neq̄ ligentia
q̄ quorundam ex magna libeꝝ impericie solaria querentium. uolentium quasi in
saculo quodam mendaciter cauere narrationes hystoryarum. tunc tam seriem sed
tam parum a quibz per leuitatem ⁊ regalem thymu xp̄i originem habuit cum
corꝝ opibz in unum opusculum redigere. qd̄ et fastidientibz polycratem sp̄
subiectam oculis formam animi sic oblectatio. ⁊ studiosis facile possint p̄ oculis habita memorie dñe
dari. ⁊ omnibz legentibz utilitas offerri. id̄ q̄ dem laborum n̄ facilem. immo uero cuꝝ plenū uigiliu
assumpt. cum breuitate sedm̄ datam formam ita studui. ut nich̄ de uitate hystorie detrahatur. s. ab
adam in eoan̄ p̄ patriarchas. iudices. reges. p̄ phas. sacerdotes. eis ⁊ reprobos. usq̄ ad xp̄m finē. s. nostrum
ordinem p̄ducat;

Chaym agricola uolens sua munia et
n̄ fructu esse rep̄bata. licet a oīno mare
paratū fructū suū in septiformi petro
interferebat qui postea uagus ⁊ instabilis super
terram factus postquā a domino est maledictus.

Adā in agro damasceno formatū. ⁊ in paradiso inde
quatuor flumina oriuntur translatus. cum femine de col
ti conuictus sit. eua nomine inposito scit ⁊ ceteris re
bus de xpo q̄ ecclia p̄phasit. ⁊ eudem de comediendo pomo
acquiescit. ⁊ dissonnentia nudatū factū per roman
bus a domino de paradiso collocatū cherubim ⁊ flamm
is gladio ⁊ p̄ m̄pationem abiectus de tra maledicta
in sudore uultus p̄ panem atque uir.

Considerans historie sacre prolixitatem,
nec non et difficultatem solum quoque circa studium sacre lectionis,
maxime illius que in historie fundamento uersatur negligentiam,
quorundam quoque ex inopia librorum imperitie sue solatia querentium,
uolentium quasi in sacculo quodam memoriter tenere narrationes historiarum,
temptaui seriem sanctorum patrum,
a quibus per leuiticam et regalem tribum Christus originem habuit,
cum eorum operibus in unum opusculum redigere.

Quod et fastidientibus prolixitatem propter subiectam oculis formam animi sit oblectatio,
et a studiosis facile possunt pre oculis habita memorie commendari,
et omnibus legentibus utilitas conferri.

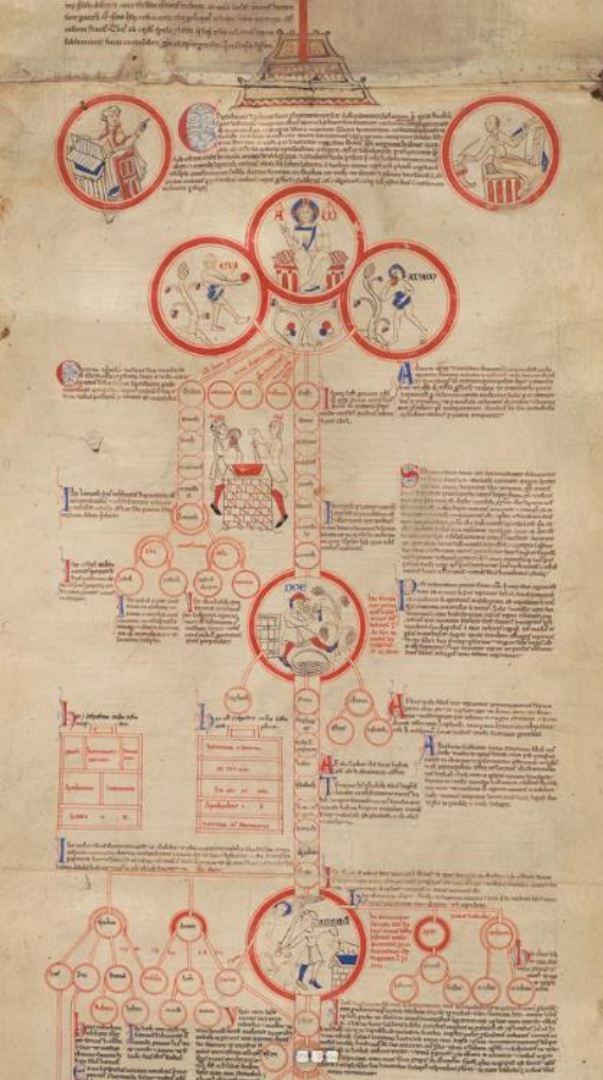

In quo quidem non facilem laborem immo negotium plenum uigiliarum assumpsi
cum breuitati secundum datam formam ita studui,
ut nichil de ueritate historie detruncarem,
sed ab Adam incohans per patriarchas, iudices, reges, prophetas et sacerdotes eis contemporaneos
usque ad Christum finem nostrum ordinem perduxim.

Considering the complexity of sacred history,
and the difficulties encountered by scholars who study it,
especially those who have neglected the most basic facts of history,
and also those who for a lack of books seek a remedy for their limited expertise,
wishing to retain in the memory the historical narratives as if they were in a little bag,
I have attempted to reduce into one work the sequence of the holy fathers
from whom through the priestly and royal tribe Christ took his origin,
along with their actions.

It is recommended for those put off by the complexity,
so that they can enjoy its form laid out in front of their eyes,
and for those who study it, so they can more easily keep it in their memory.
May it be of use to all readers.

I have undertaken this difficult task with the utmost assiduity and vigilance,
and with brevity according to the given form.

Therefore I have taken care to skip over nothing of the historical truth,
but beginning with Adam, I have proceeded in strict order, through the patriarchs, judges, kings,
and prophets and priests, coeval to them, until Christ our end.

How to digitally represent the 'Compendium'

... enabling the user:

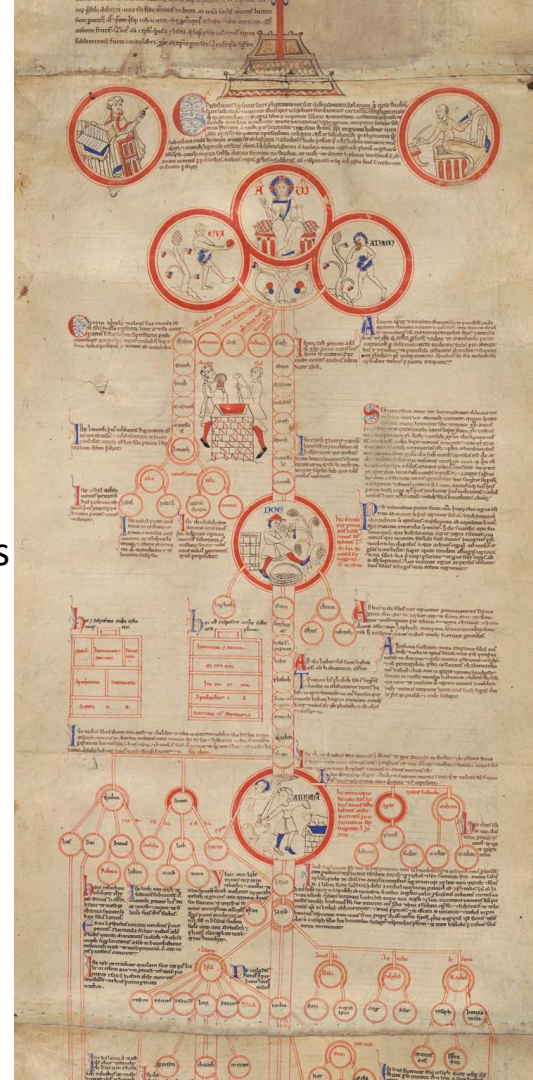

- to navigate through the material (facsimiles, transcripts)
- to analyze and compare the history and contents of the MS witnesses
 - topographic relations
 - graph structures
 - textual components
 - diagrammatic components
 - iconographic components
- to engage with and understand the text (holistic approach)

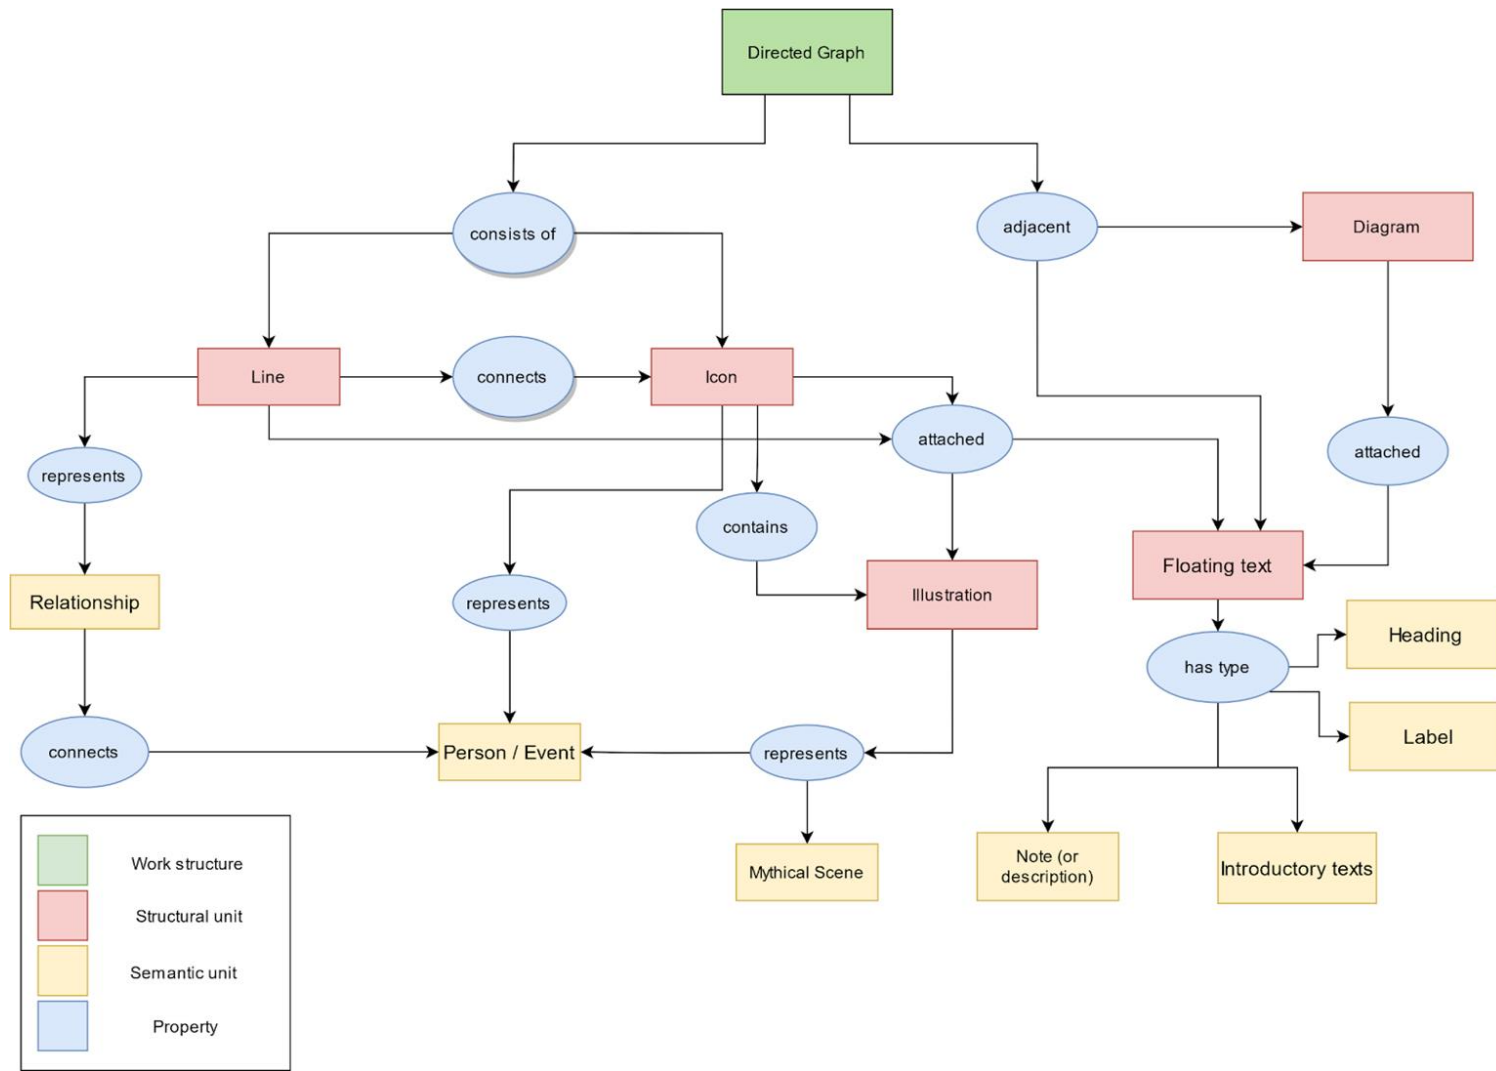

Structural elements of the *Compendium Historiae*

Graphic visualisation of the genealogy of Christ

- biblical and historical persons represented as nodes
- genealogical/historical relationships bw persons represented as lines/arcs
- labels and headings identifying persons or specifying relationships
- descriptive texts referring to persons, actions and events
- illustrations of biblical facts
- parallel graphs representing the succession of judges, kings & prophets
- topography indicating diachronicity and synchronicity

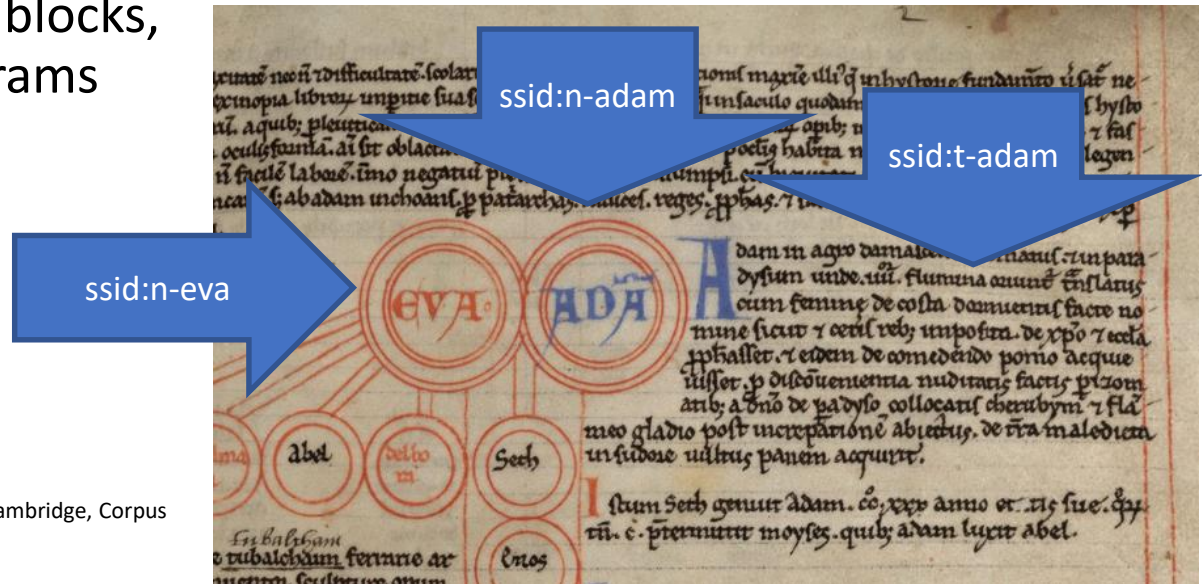

Various aspects of representation in TEI

- Topographical representation
 <zone> and <facsimile>
- Graph representation
 <node> and <arc>
- Textual representation
 <note> and <label>
- Semantic representation
 <person> and <relation>
- Iconographic representation
 <figure> and <figDesc>

Zone capture with Cadmus CHIGC

The screenshot shows the Cadmus CHIGC web application. The top navigation bar includes the logo, "Cadmus CHIGC", "Items", "Search", "Resources", and a user profile icon labeled "ccc-ms029". The main heading is "CHGC Image Annotations Part". Below this, there are tabs for "Annotator" and "Gallery". The "Annotator" tab is active, displaying a manuscript page with a yellow rectangular zone capture annotation. The manuscript text is in Latin, and the page features circular red annotations. The bottom of the page shows a list of items, including "Moses", "Aaron", and "Moses", with a search bar and a "0" indicator.

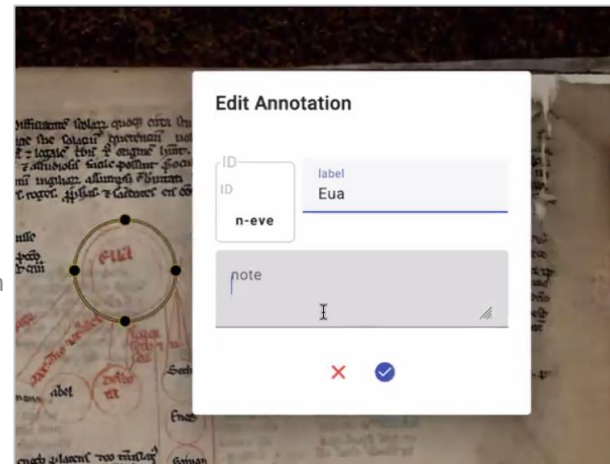

This screenshot shows the same Cadmus CHIGC interface as the previous one, but with an "Edit Annotation" dialog box open. The dialog box has fields for "ID", "label", and "note". The "ID" field contains "n-moses", and the "label" field is empty. The "note" field is also empty. The dialog box has a red "X" button and a green checkmark button. The background shows the manuscript page with the yellow rectangular zone capture annotation and the "Annotator" tab selected.

Topographical representation: Image annotation with Cadmus CHIGC

Critical Text

Manuscript Database

achievements of digital editions

- facsimiles
 - material & visual aspects of mss. & documents
- multiple text layers
 - (hyper-)diplomatic, genetic, normalised, corrected, critical &c.
- multiple witnesses & versions
 - heterogeneity & richness of textual tradition
- annotation & analysis
 - palaeographic, linguistic, metric, stylistic, semantic &c.
- functionality & access
 - hyperlinks, tools, visualisation, user interaction, participation &c.
- distributed architecture
 - linked open data, IIIF, FAIR principles &c.

digital textual criticism?

- full documentation of the textual tradition
 - material (facsimiles)
 - descriptive (catalogue & meta data)
 - contents (transcripts)
- progressive, collaborative analysis & enrichment
 - critical annotation
 - contextualisation & linking to external knowledge bases
 - embedding of external resources
- formalisation of critical methodology
 - full & consistent record of variance
 - transparent & revisable classification & evaluation
 - data driven & controlled constitution of the critical text & apparatus

The success of a critical edition relies on its ability to connect a system of data. With computer-assisted collation methods and full-text transcriptions, the process that leads to a critical text becomes comprehensive, thorough, and more transparent to the reader.

In consequence, the critical text turns into a window through which we can observe the circumstances and the intervention of many of the agents that made it possible for us to engage with the texts.

Bordalejo & Vázquez, *You're Collating Just Fine and Other Lies You've Been Telling Yourself*. Digital Medievalist 14 (2021)

... variants come in all sorts of colours and flavours, not in the tame forms presented in the regularized apparatus, but in the fauvist diversity of their original spellings and bewildering word rearrangements. My critical text aims to highlight variance, not to mask it.

Bordalejo, *Well-Behaved Variants Seldom Make the Apparatus: Stemmata and Apparatus in Digital Research*. Digital Medievalist 14 (2021)

a digital scholarly edition is...

the critical representation of a historical, literary or documentary text,
established and provided under the conditions of a digital ecosystem
of scholarly knowledge resources

prospectives...

what is next?

- linked open data and the reconceptualization of the edition as a network of distributed digital scholarly resources
- machine learning, artificial intelligence and large language models
- born-digital literatures and textual heritage

Turning FAIR into reality

Final Report and Action Plan

The FAIR guiding principles: <https://doi.org/10.1038/sdata.2016.18>

To be Findable:

- F1. (meta)data are assigned a globally unique and persistent identifier
- F2. data are described with rich metadata (defined by R1 below)
- F3. metadata clearly and explicitly include the identifier of the data it describes
- F4. (meta)data are registered or indexed in a searchable resource

To be Accessible:

- A1. (meta)data are retrievable by their identifier using a standardized communications protocol
 - A1.1. the protocol is free, open and universally implementable
 - A1.2. the protocol allows for an authentication and authorization procedure, where necessary
- A2. metadata are accessible, even when the data are no longer available

To be Interoperable:

- I1. (meta)data use a formal, accessible, shared, and broadly applicable language for knowledge representation
- I2. (meta)data uses vocabularies that follow FAIR principles
- I3. (meta)data include qualified references to other (meta)data

To be reusable:

- R1. (meta)data are richly described with a plurality of accurate and relevant attributes
 - R1.1. (meta)data are released with a clear and accessible data usage license
 - R1.2. (meta)data are associated with data provenance
 - R1.3. (meta)data meet domain relevant community standards

3 complementary aspects

- integration of AI into the editorial workflow
 - incl. planning, design, and evaluation of digital editions
 - code development for web applications and user interfaces
 - structured communication with a ›human in the loop‹ guidance
- prompt engineering
 - for effective model interaction through natural language
- AI Engineering / technical enhancements, e.g.
 - **retrieval-augmented generation (RAG)** => for integrating external knowledge bases
 - vector databases
 - tool integration (extending the base capabilities of LLMs).

typical editorial workflow

- (1.) documentation of textual transmission
- (2.) post-processing of retro-digitized editions
- (3.) text establishment (transcription, Document Layout Analysis, OCR/HTR post-processing, basic markup)
- (4.) normalization
- (5.) named entity recognition (NER) and deeper semantic annotation
- (6.) named entity linking (NEL) information enrichment
- (7.) translation & (8.) summarization

Prompt engineering - a discipline its own right

An (iterative) process of designing and optimizing prompts to effectively communicate with an LLM to improve accuracy and control bias of the response.

Key prompting strategies include:

- ***few-shot prompting:***
providing examples enabling in-context learning
- ***chain-of-thought:***
breaking down problems into step-by-step reasoning
- ***persona/expert prompting:***
assigning a specific role or expertise
- ***reflection prompting:***
encouraging self-evaluation and refinement of responses

Prompt Engineering

Persona Modelling

Specificity + ~"Few-Shot Prompting"

Emotional prompting

Bsharat, Sondos Mahmoud, Aidar Myrzakhan, and Zhiqiang Shen. "Principled Instructions Are All You Need for Questioning LLaMA-1/2, GPT-3.5/4." arXiv, December 26, 2023. <https://doi.org/10.48550/arXiv.2312.16171>.

Li, Cheng, Jindong Wang, Yixuan Zhang, Kaijie Zhu, Wenxin Hou, Jianxun Lian, Fang Luo, Qiang Yang, and Xing Xie. "Large Language Models Understand and Can Be Enhanced by Emotional Stimuli." arXiv, November 12, 2023. <https://doi.org/10.48550/arXiv.2307.11760>.

Pollin, C. (2024). Workshopreihe "Angewandte Generative KI in den (digitalen) Geisteswissenschaften" (v1.1.0). Zenodo. <https://chpollin.github.io/GM-DH/>

You will act as a skilled expert automaton that is proficient in transforming unstructured text, specifically multilingual letters from or to Hugo Schuchardt (1842-1927), into well-formed TEI XML. **Analyze the provided text based on the mapping rules I have shared and then execute the transformation to produce TEI XML, ensuring you adhere to the guidelines and only annotate if certain.**

Mapping rules:

- * <div> Entire letter
- * <pb> Marks page breaks e.g. "|{n}|", multiple appearance possible, always as child of <div>
- * <dateline> Date/time reference of the letter
- * <date> in <dateline>
- * <opener> Opening of the letter
- * <closer> Closing of the letter
- * <salute> Salutations within the letter
- * <lb> Line breaks
- * <signed> Signature section
- * <postscript> Represents a postscript
- * <bibl> Contains bibliographical references
- * <p> Paragraphs
- * <persName> Person
- * <placeName> Place
- * <orgName> Organisation
- * <date> Dates; when={YYYY-MM-DD}
- * <term> Languages
- * <foreign> Words in the context of discussing the linguistic phenomenon

Guidelines:

- * Strictly follow mapping rules
- * Preserve the original text
- * Produce well-formed TEI XML according to TEI standards
- * Return the <div> only
- * Annotate only when appropriate
- * Preserve complexity of output
- * Compact XML without any whitespace or indentation

Brief von Friedrich August Otto Benndorf an Hugo Schuchardt:

{text}

This is very important for my career!

Nils Reiter

@nilsreiter@social.cologne

Hot take: When you're evaluating #LLMs, and you're including non-local, API-based models, you're not doing model evaluation, but product testing.

Editopia

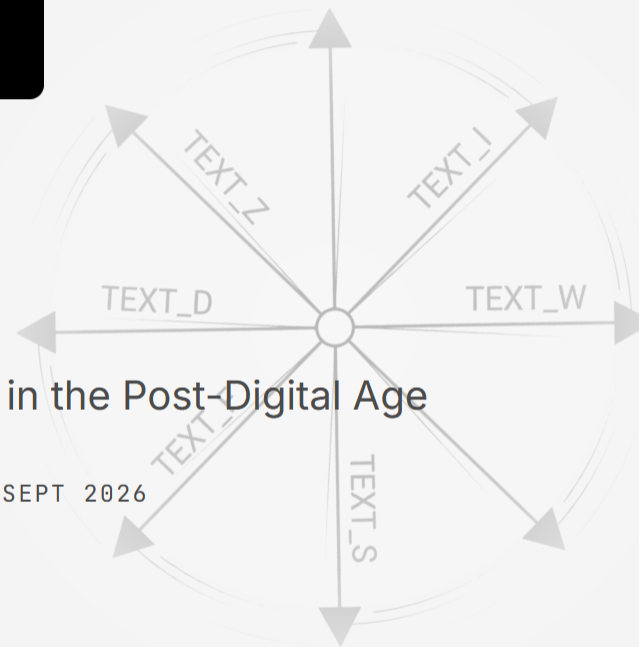

On the Future of Documentology and Scholarly Editing in the Post-Digital Age

CONFERENCE OF THE

| WUPPERTAL

| 02.-04. SEPT 2026

[CALL FOR PAPERS](#)

On the occasion of its 20th anniversary, the Institute for Documentology and Scholarly Editing (IDE) invites scholars to engage with these questions at the international conference **Editopia**. By *post-digital* we understand a condition in which digital tools and modes of thinking are no longer conceived primarily in opposition to the analogue, but as the foundation of humanities scholarship and, consequently, as the basis for further-reaching questions.

[KEY QUESTION]

„Data constitute the content and core of the edition,
and data themselves are primarily fluid, processual
and networked.“

Transcribe Bentham

[Home](#)[Transcription Desk](#)[Blog](#)[About Us](#)

Welcome to Transcribe Bentham!

By uczwlse, on 6 December 2017

Jeremy Bentham

'Many hands make light work. Many hands together make merry work', wrote the philosopher and reformer, Jeremy Bentham (1748–1832) in 1793.

In this spirit, we cordially welcome you to *Transcribe Bentham*, a double award-winning collaborative initiative which is crowdsourcing the transcription of Bentham's previously unpublished manuscripts.

Anyone can start transcribing at our [Transcription Desk](#). Your transcripts will contribute to the production of Bentham's *Collected Works* and preserve Bentham's writings into the future.

Scribes of the Cairo Geniza

Welcome to Scribes of the Cairo Geniza, your chance to work with others to unlock the secrets of one of the greatest archives of the middle ages. Hidden for centuries in an attic in Cairo, over 300,000 fragments of pre-modern and medieval Jewish texts—from everyday receipts to biblical works—have yet to be fully deciphered.

The first step of the project, is to **sort** the fragments by script type and level of difficulty.

Next, we analyze the sorted piles by **transcribing** the relatively easy fragments, and by finding key **phrases** that will eventually be used to help decipher the more

'My name is Patrick...

I am a sinner, a simple country person, and the least of all believers. I am looked down upon by many.

My father was Calpornius. He was a deacon; his father was Potitus, a priest, who lived at Bannavem Taburniae.

His home was near there, and that is where I was taken prisoner.

I was about sixteen at the time.

Seeking Patrick

Novel by Derick Mockler

Preface

Towards the end of the seventh century, an Irish churchman named Muirchú moccu Mochtéine wrote one of the earliest, if not the earliest, of the Lives of St Patrick that have survived. History tells us only a little about Muirchú. He wrote at the request or command of Aodh, Bishop of Sleaty, a monastery which was situated near present-day Carlow. In 697 A.D., Muirchú was a signatory of an important law agreed at the Synod of Birr—the "Cáin Adamnáin" which provided protection for non-combatants in time of war.

"Seeking Patrick" imagines the circumstances in which Muirchú's biography of Patrick could have been written, as well as how it could have been planned and carried out; it is historical fiction rather than history. In other words, the story does not say "this is how it happened"; it says "this is one of several possible ways in which it could have happened." Every effort has been made to avoid violating any known historical fact.

Where Irish-language words or phrases are included, modern Irish is used. For the sake of those not familiar with the language, the text is so designed as to make at least the broad meaning clear. Place-names are given in their modern English-language forms, where such forms exist; names of some territories, such as Brega, Cuala or Ulaidh (which is not coterminous with modern Ulster) have no such equivalents. In this context it should be pointed out that the Meath of the text includes the modern county of Westmeath.

Most of the characters are invented. As has been mentioned, Muirchú and Aodh are historical figures; Conchadh, Cogitosus, Ultan, Tírechán and Séighín also existed. But their personalities and most of their activities may, of course, have been quite different from what is portrayed here. A few facts are known, beyond those mentioned above; Cogitosus did write a Life of St Brigit which has survived as has Tírechán's Life of St Patrick, and Aodh did affiliate the Sleaty monastery to Armagh in the late

Abstract

Contents

About the author/editor

As the papers in this volume testify, digital scholarly editing is a vibrant practice. Scholarly editing has a

Accidental editors and the crowd

Ben Brumfield¹

Club lecture given at 'Academia, Cultural Heritage, Society' DiXiT Convention, Cologne, March 14-18, 2016.²

Thanks to DiXiT for bringing me here and thank you all for coming. All right, my talk tonight is about accidental editors and the crowd. What is an accidental editor? Most of you people in this room are here because you're editors and you work with editions. So I ask you, look back, think back to when you decided to become an editor. Maybe you were a small child and you told your mother, 'When I grow up I want to be an editor.' Or maybe it was just when you applied for a fellowship at DiXiT because it sounded like a good deal.

The fact of the matter is there are many editions that are happening by people who never decided to become an editor. They never made any intentional decision to do this and I'd like to talk about this tonight:

digital scholarly editions

- documentary editions
- archive editions
- technology-driven editions
- progressive editions
- crowd sourcing editions
- participatory editions
- genetic editions
- multi-witnessed editions
- critical editions
- text collections / edition platforms

what editorial model to follow?

that depends from...

- textual material & transmission
- human & financial resources
- technology, tools & standards
- textual perspective & textual criticism
- research questions
- best practices in digital humanities & the disciplines
- social relevance

how to evaluate scholarly editions?

Criteria for Reviewing Scholarly Digital Editions, version 1.1

Patrick Sahle; in collaboration with Georg Vogeler and the members of the IDE; Version 1.1, June 2014 (Version 1.0, September 2012 – January 2014; German version 1.1: <http://www.i-d-e.de/publikationen/weitereschriften/kriterien-version-1-1/>).

Major contributions to this English version by: Misha Broughton, James Cummings, Franz Fischer, Philipp Steinkrüger, Walter Scholger.

Preliminary remarks

Scope

Definitions. This paper provides a framework for the description and evaluation of scholarly digital editions (SDE).^[1] A scholarly edition is an information resource which offers a critical representation of (normally) historical documents or texts. Scholarly digital editions are not merely publications in digital form; rather, they are information systems which follow a methodology determined by a digital paradigm, just as traditional print editions follow a methodology determined by the paradigms of print culture. Given this narrow understanding of SDEs, many digital resources can not be considered digital editions in this strict sense. Digitized printed editions or digitization projects in libraries and archives – even with their subsequent descriptive, transcriptive and indexing information –

Manifest für digitale Editionen

Veröffentlicht von Christiane Fritze am 11. März 2022

64

*Das Institut für Dokumentologie und Editorik sieht die Notwendigkeit, auf ungünstige Faktoren bei der Erstellung und Erhaltung von digitalen Editionen aufmerksam zu machen, um die Situation in Zukunft besser gestalten zu können. Bei der 8. Jahrestagung des Verbands »Digital Humanities im deutschsprachigen Raum«, der DHd2022, wurde am 7. März in einem Workshop zum Thema gemeinsam mit den Teilnehmer*innen ein Manifest für Digitale Editionen erarbeitet (siehe das Abstract auf [Zenodo](#)). Übersetzungen sind in Vorbereitung und können von allen Interessierten bearbeitet werden.*

Vorbemerkungen

[1] Digitale Editionen machen durch Erschließung und Wiedergabe unser kulturelles und geistiges Erbe sichtbar, zugänglich und nutzbar. Editionen sind eine Kernaufgabe der Wissenschaften und bilden die Grundlage für weitere Forschung.

[2] Die zu edierenden Gegenstände bilden zusammen mit den auf sie bezogenen Fragestellungen ein *Edendum*. Die Grenzen der Edition liegen nicht an den Grenzen von Werken (z.B. literarische, mu-

Osservazioni preliminari

[1] Le edizioni scientifiche digitali rendono il nostro patrimonio culturale e intellettuale visibile, accessibile e utilizzabile attraverso una rappresentazione criticamente fondata. La produzione di edizioni rappresenta un aspetto fondamentale della ricerca umanistica in quanto esse costituiscono la base per ulteriori ricerche.

[2] Gli oggetti su cui si esercita l'attività ecdotica, insieme agli interrogativi che generano, formano un *edendum*. I limiti dell'edizione non sono determinati dai limiti delle opere (per esempio letterarie, musicali, pittoriche), dei testi (anche nel più ampio concetto di testo) o dei documenti (per esempio lettere, documenti d'archivio, oggetti, media audiovisivi, dati nativi digitali). In linea di principio, ogni espressione culturale, indipendentemente dalla sua origine, modalità, medialità e materialità può essere oggetto di edizione: può essere un *edendum*, che viene esaminato criticamente e arricchito di conoscenza nel processo editoriale.

[3] Sulla scia di un cambio di paradigma fondamentale, le edizioni digitali sono ormai la norma in tutte le discipline. Il paradigma digitale ha conseguenze dirette sulla produzione, l'edizione, la riproduzione, l'organizzazione e la circolazione della conoscenza creata nel processo editoriale. Questo richiede un aumento dei requisiti teorico-metodologici, tecnici e organizzativi, che le persone e le istituzioni gestiscono in modo collaborativo e flessibile.

[4] Le edizioni digitali si rivolgono tanto alla comunità scientifica quanto a un pubblico più ampio. Con questo manifesto, i firmatari rispondono alle mutate condizioni del processo editoriale nel paradigma digitale. Il manifesto si rivolge a coloro che si occupano direttamente di progettare edizioni digitali (università, istituzioni di ricerca, tecnologie dell'informazione) e a un pubblico 'esterno', costituito dagli enti finanziatori e dagli utenti. Il manifesto serve da orientamento per tutti coloro che condividono la preoccupazione fondamentale di conservare, analizzare e rappresentare criticamente le fonti, e diffondere il patrimonio culturale.

[5] Le sfide dell'edizione digitale sono intese come una necessità e, allo stesso tempo, un'opportunità. Esse possono essere descritte da quattro punti di vista: i presupposti metodologici, le questioni organizzative, i requisiti fattuali e la dimensione sociale del lavoro interdisciplinare collaborativo.

Take aways
